

Figures and tables

FIGURES

1.1	Map of the A15 Maasvlakte-Vaanplein project in the port of Rotterdam, the Netherlands	2
1.2	Aerial view of one of the sites of the A15 Maasvlakte-Vaanplein project in Rotterdam, the Netherlands	5
1.3	The new railway bridge at Moerdijk, the Netherlands, is part of the HSL-Zuid megaproject	8
2.1	General overview of the research process in QCA	18
2.2	Outcomes of cases can emerge under different configurations of conditions	26
2.3	Example of a codebook, generated from the ATLAS.ti software for data coding	42
2.4	Example of a code-tree derived from the research presented in Verweij and Gerrits (2015)	43
2.5	Simplified overview of conditions included in the Room for the River program theory evaluation	49
3.1	Example of the calibration of the condition 'hot water'	58
3.2	Example of the calibration of the condition 'hot water' with QCA based on set-theory	58
3.3	First calibration alternative of construction companies' bidding for a contract for a particular plot	61
3.4	Second calibration alternative of construction companies' bidding for a contract for a particular plot	63
4.1	Transformation of a calibrated data matrix into a truth table	90
4.2	Graphical representation of the minimization of a hypothetical truth table	96
4.3	Graphical representation of the minimization of a hypothetical mvQCA truth table with two conditions	97
5.1	Example of visualization of QCA results with an XY-plot	140
5.2	Example of visualization of QCA results with a Venn diagram	141
5.3	Example of visualization of QCA results with a flow diagram	142

TABLES

2.1	General characteristics of the case-based approach and the variable-based approach	17
2.2	Empirical studies in infrastructure development and use, using QCA	19
3.1	Example of theory-driven crisp-set calibration	71
3.2	Example of qualitative case-driven fuzzy-set calibration	73
3.3	Example of theory-driven fuzzy-set calibration	76
3.4	The calibrated data matrix of 27 road construction projects	78
4.1	Basic notations and operations in QCA	86
4.2	Overview of the differences between necessity and sufficiency	87
4.3	The truth table of 27 road construction projects	92
4.4	The results of the QCA study of 27 road construction projects	96
4.5	Overview of the strategies for dealing with logical contradictions and limited diversity	110
5.1	Summary of different strategies to integrate time in QCA	130
5.2	Example of visualization of QCA results	139
