Capalbo, S.M. 157
capital–labour–energy trends 153–9
cattle stocking, Botswana rangelands 163–71
CBA (cost–benefit analysis) and nature policy 127–8
certification and green products 97
charitable giving 94
Clark, J. 63
coevolution of values 32–3
coffee production-to-consumption system 201–6
cointegration modelling 147
Collier, P. 161
Collingwood, R. 55
Coming Anarchy, The 67
Common, M. 60
consumers, green motivation 96–8
context dependence of economic values 78–84
contingent valuation method, natural assets 138
control costs, use of material budgets 187–8
control targets, use of material budgets 184–7
Coon Creek, catchment management 188–9
Costanza, R. 2, 132
cost–benefit analysis, nature policy 127–8
Crotty, M. 37
CVM (contingent valuation method), natural assets 138
decoupling of economic output and resources 152
delays in dynamic systems 183
developing countries, natural resource protection 136–7
development studies and sustainability 57–9
Diamond, J. 59
Diamond, P.A. 84
disciplinary research 39
discounting, future gains and losses
82–4
Dovers, S. 55, 59–60
Drabek, A. 57
Dryzek, J. 66

ecofeminism 67
ecological economics 89–91
and behavioural economics 77–85
and economic psychology 94–9
and sustainability 60–61
ecological-economic integration for
nature policy 127–35
ecological and social sustainability
193–208
economic instruments
and environmental policy 124–5
non-point pollution control 189–90
economic psychology 91–4
and ecological economics 94–9
see also behavioural economics
economic value of gains and losses
78–84
economics, ecological see ecological
economics
ecophilosophy 63
ecosystem health 28
ecosystem pricing 14–16
Eden, S. 68
employment, green motivation 96
energy efficiency trends, modelling 151–9
using Kalman filter 153–9
energy purchase, green motivation 97
entropy principle and production theory
16–17
environmental auditing 198
environmental concern 96–9
environmental economics 90
and nature policy 121–2
environmental history and sustainability
59–60
environmental impact and trade 195
environmental policy, evolutionary
approach 18–19
environmental reporting 198
environmental resources see natural
assets
Environmental sociology 66
environmental valuation 14–16, 77–84
epistemology and environmental policy-
making 19–20
equity 31
erosive land uses, material budgets
184–6
ethical investment 98
Etzioni, A. 93
Evans, R. 188
evolutionary approach to environmental
policy 18–19
exploratory approach to research 39–42
externalities and environmental policy
124
factor augmentation trends 150
energy efficiency 154–5
Feachem, R. 61–2
feedbacks, dynamic systems 179–83
Fenneman, N. 69
fertilizer input, Lake Mendota 186–7
Fisher, J.V. 128–9
flows analysis, production-to-
consumption system 202–7
flows, dynamic systems 178–9
future gains and losses, discounting
82–4
