Tables

2.1 Gross decomposition results, 1980–2000 15
3.1 Industry output, value added and employment, 2000 31
3.2 Growth of industry output by sub-period 33
3.3 Growth of output and intermediate inputs, 1980–2000 36
3.4 Growth of capital input, stock and quality, 1980–2000 44
3.5 Growth of labor input, hours and quality, 1980–2000 51
3.6 Sources of growth of industry output, 1980–2000 54
3.7 Sources of growth in industry labor productivity, 1980–2000 62
3.8 Contribution of industry capital input by sub-period 64
3.9 Contribution of industry labor input by sub-period 65
3.10 Contribution of industry energy input by sub-period 66
3.11 Contribution of industry materials input by sub-period 67
3.12 Growth of industry total factor productivity by sub-period 68
3.13 Growth of industry labor productivity by sub-period 70
4.1 Transformation of production and employment pattern, 1978–1999 78
4.2 Average annual contribution of each sector to structural transformation 79
4.3 Changes in tariffs, taxes and non-tariff barriers, 1986–1996 85
4.4 Tariff and its structure in China 86
4.5 Growth of trade 87
4.6 The values of export of goods and services classified by Chinese manufacturing industries in 1973–1992 88
4.7 The ratios of export in each industry to the export in total manufacturing, 1985–1995 89
4.8 Direction of China’s trade (export) 90
4.9 Distribution of FDI by economic sectors in manufacturing 93
4.10 Share of China’s exports and imports in GDP 93
4.11 Classification of industries by annual rate of growth of output and productivity 104
4.12 The Domar aggregation TFP index 105
4.13 Classification of industries by annual rate of growth of three input categories 107
4.14 Predominant source of output growth among 33 industries 108
4.15 Primary source of output growth in 33 industries 108
4.16 Sources of output growth 108
5.1 Characteristics of Korean database for KLEM model 122
5.2 KLEM data in Korea (1984–2002) 126
5.3 Gross output growth accounting of TFP in whole industry in Korean economy 127
5.4 Gross output growth accounting of TFP in manufacturing 129
5.5 Gross output growth accounting of TFP in services 130
5.6 Value-added growth accounting of TFP in whole industry 132
5.8 Investment in IT sector 135
5.9 The growth of labor productivity 135
5A.1 Input–output tables for Korea 138
5A.2 Reclassification of I/O tables into 33 sectors 139
5A.3 Reclassification of national accounts into 33 sectors 142
6.1 The growth of real total output by industry (1981–1999) 157
6.2 The growth of capital input by industry (1981–1999) 158
6.3 The growth of labor input (1981–1999) 159
6.4 The growth of energy input by industry (1981–1999) 161
6.5 The growth of intermediate input by industry (1981–1999) 162
6.6 Total factor productivity (1981–1999) 163
6.7 Contributions of inputs and TFP to sectoral output growth in Taiwan 165
6.8 International comparison on TFP growth among US, Japan and Taiwan (1980–2000) 173
6A.1 Property compensation by sector 177
6A.2 The concordance between 160 sectors in I/O table and 34 sectors in ICPA project 179
6A.3 160 sectors in I/O table of Taiwan 180
7.1 PPPs and relative prices of industry output in Japan, South Korea and Taiwan relative to the United States, 1997 190
7.2 ICOP PPPs in agriculture, 1997 192
7.3 ICOP PPPs in mining, 1997 193
7.4 PPPs for construction in Japan and South Korea, 1997 193
7.5 PPPs for construction in Taiwan, 1997 193
7.6 PPPs for manufacturing, 1997 196
7.7 PPPs for transportation, 1997 199
7.8 PPPs in communication, 1997 200
7.9 PPPs for electricity and gas, 1997 201
