Introduction	1
<i>Hans Keman and Jaap J. Woldendorp</i>	
<b>PART I POLITICAL SCIENCE: RANGE, SCOPE AND CONTESTED METHODOLOGIES</b>	
1 Political science: researching a multifaceted topic in essentially contested ways	9
<i>Philippe C. Schmitter</i>	
1 Introduction	9
2 Agents	10
3 Units	12
4 Motives	13
5 Mechanisms	14
6 Regimes	17
7 Methods	17
8 Theories	19
9 Conclusion	21
2 Epistemology and approaches: logic, causation and explanation	24
<i>Dirk Berg-Schlosser</i>	
1 Introduction	24
2 The epistemological foundations of the social sciences	25
3 Thinking about causality	29
4 Conclusions	34
3 Taking critical ontology seriously: implications for political science methodology	38
<i>Angela Wigger and Laura Horn</i>	
1 Introduction	38
2 The 'critical' in critical social science	39
3 Emancipation and social change in critical perspectives	41
4 Meta-theoretical commitments of critical social science	43
5 Methodological implications and critical research in political science	46

vi *Handbook of research methods and applications in political science*

6	Feminist perspectives as critical research	48
7	Concluding reflections	50
4	Relating theory and concepts to measurements: bridging the gap	54
	<i>Paul Pennings</i>	
1	Introduction	54
2	The basics of conceptualization	54
3	Transforming concepts into units of measurement	57
4	Validity: criteria to evaluate the quality of operationalization and measurements	58
5	From operationalization to data	60
6	Conclusion	62
5	On time and space: the historical dimension in political science	64
	<i>Hans Keman</i>	
1	Introduction	64
2	Theory, method and meta-choices	64
3	Political science and historical analysis	67
4	Analyzing politics over time and space	68
5	Ontologies, methodology and a few caveats	74
6	Conclusion	75
6	Systems theory: the search for a general theory of politics	79
	<i>Hans Keman</i>	
1	Introduction	79
2	The introduction of systems theory in political science	79
3	Systems theory and the study of politics	81
4	How a political system can be analyzed: parliamentary regimes	85
5	Conclusion: system theory and extant applications	91

**PART II APPROACHES: EXPLORING POLITICAL INTERACTIONS**

7	Applying multilevel governance	97
	<i>Arjan H. Schakel</i>	
1	Introduction	97
2	The development of the concept of multilevel governance	98
3	Multilevel governance in the European Union	100
4	Multilevel governance below and above the central state	102
5	Multilevel governance and methodological nationalism	105
6	Conclusion	106

8	Regime types: measuring democracy and autocracy	111
	<i>Manfred G. Schmidt</i>	
1	Introduction	111
2	Towards measuring democracies and autocracies	111
3	Democracy and autocracy measures for the nineteenth, twentieth and twenty-first century	115
4	Political rights and civil liberties: the Freedom House ratings	118
5	'Status of democracy' and governance-based indices of democratic and autocratic regimes	120
6	Advantages and limitations of the measurements of democracy and autocracy	122
9	Institutional analysis: progress and problems	127
	<i>B. Guy Peters</i>	
1	Introduction: the tradition of institutional analysis	127
2	Neo-institutionalism and the revival of institutional analysis	128
3	Creating institutional difference and its consequences	131
4	Institutions for managing difference	133
5	Challenges to institutional analysis	134
6	Conclusion: the promise of institutional analysis	137
10	Political actors: parties–interest groups–government	141
	<i>Nicole Bolleyer</i>	
1	Introduction	141
2	Political parties and interest groups between society and the state	143
3	Parties, interest groups and government	147
4	Conclusions	150
11	Social movements and political action	155
	<i>Bert Klanderfans</i>	
1	Introduction	155
2	Participation in movement politics and party politics	157
3	Dynamics of political participation: theoretical framework	159
4	People and their motives: dynamics of demand	159
5	Organizations and their appeals: dynamics of supply and mobilization	162
6	Coda	165
12	International relations and transnational politics	169
	<i>Andreas Nölke</i>	
1	Foreword	169

viii	<i>Handbook of research methods and applications in political science</i>	
2	Introduction: transnational versus inter-state politics	170
3	Policy network analysis as a method for distinguishing transnational politics and international relations	173
4	Framework conditions for the salience of transnational policy networks and empirical application	177
5	Summary and evaluation	179
13	Political economy: economic miracles and socio-economic performance	184
	<i>Barbara Vis, Jaap J. Woldendorp and Kees van Kersbergen</i>	
1	Introduction	184
2	Institutions, miracles and socio-economic performance	185
3	Miracles	191
4	Quantitative studies on (the variation in) socio-economic performance	192
5	Conceptualization of the dependent variable	194
6	Evaluation	198
14	Political theory and its normative methods	202
	<i>Keith Dowding</i>	
1	Introduction	202
2	What is the role of normative political theory?	203
3	Conceptual analysis	203
4	Evidence in normative theory	206
5	Constitutional theory	209
6	Socratic dialogue	210
PART III ANALYZING POLITICS: DATA–CONCEPTS–TECHNIQUES		
15	Organizing and developing data sets: exemplified by the Party Government Data Set	217
	<i>Jaap J. Woldendorp</i>	
1	Introduction	217
2	The Party Government Data Set	219
3	Data on party government: more data needed on a lower level of aggregation	220
4	Data on the life cycle of party government	224
5	The institutional context	230
6	Conclusion	232

16	Political institutions	234
	<i>Klaus Armingeon</i>	
1	Introduction	234
2	What are political institutions and what are they for?	234
3	How to operationalize institutions and where do we find the data?	238
4	What difference do institutions make?	240
17	Studying voting behavior	248
	<i>Joop J.M. van Holsteyn and Galen A. Irwin</i>	
1	Introduction	248
2	The goals of electoral research	248
3	Methods: prediction	248
4	Methods: explanation	250
5	Three main approaches of voting behavior	252
6	Other approaches	255
7	Concluding remark	257
18	The role of high-quality surveys in political science research	262
	<i>Sarah Butt, Sally Widdop and Lizzy Winstone</i>	
1	Introduction	262
2	What is a survey?	263
3	What makes a good survey?	265
4	Combining survey data with information from other sources	271
5	The future: do we still need surveys?	272
19	Quantitative data analysis in political science	281
	<i>Paul Pennings</i>	
1	Introduction	281
2	Discussion and applications of explorative and confirmative analysis	282
3	Discussion and applications of multivariate causal analysis	286
4	Conclusion	293
20	Models in political science: forms and purposes	295
	<i>Robin E. Best and Michael D. McDonald</i>	
1	Models in political science: forms and purposes	295
2	Basic features of models	295
3	Verbal models	296
4	Descriptive statistical models	297
5	Causal statistical models	300
6	Mathematical models	303

7	Computational models	305
8	Conclusion	306
21	Qualitative methods in political science	309
	<i>Selen A. Ercan and David Marsh</i>	
1	Introduction	309
2	The role of qualitative methods in political science research	310
3	Qualitative methods for generating data	313
4	Methods for analyzing qualitative data	316
5	Criticisms of qualitative research methods	318
6	Conclusion	320
22	Multilevel regression analysis	323
	<i>Jan Kleinnijenhuis</i>	
1	Introduction	323
2	An example of a hierarchically nested multilevel analysis	324
3	A multilevel model for nested FSI–WTSC multilevel data	327
4	An example of a cross-nested multilevel analysis: pooled time series	331
5	Primary lessons and further references	338
<b>PART IV RESEARCH TOOLS: QUANTITATIVE AND QUALITATIVE APPLICATIONS</b>		
23	Studying how policies affect the people: grappling with measurement, causality and the macro–micro divide	343
	<i>Staffan Kumlin and Isabelle Stadelmann-Steffen</i>	
1	Introduction	343
2	A multilevel analytical framework for research on policy feedback and citizens	345
3	Grappling with causality and measurement	349
4	Policy feedback research in practice: four recent applications	351
5	Conclusion: cross-level thinking	353
24	Regression analysis	359
	<i>Uwe Wagschal</i>	
1	Introduction	359
2	Application and capacity of regression analysis in political science	360
3	How to apply regression analysis	365
4	Strengths and weaknesses of regression analysis	380

25	Configurational comparative methods (QCA and fuzzy sets): complex causation in cross-case analysis	383
	<i>Benoît Rihoux</i>	
1	Introduction	383
2	Foundations of QCA	383
3	Main debates and innovations	385
4	Uses and protocols of QCA	388
5	The main steps of a typical QCA procedure in political science	389
6	QCA applications in political science: main trends	394
7	Conclusion: QCA's mainstreaming and diversification	396
26	Discourse analysis, social constructivism and text analysis: a critical overview	400
	<i>David Howarth and Steven Griggs</i>	
1	Introduction	400
2	The Foucauldian problematic	401
3	Critical and historical discourse analysis (CDA and HDA)	403
4	Poststructuralist discourse theory (PDT)	409
5	Applying discourse: logics of critical explanation	411
6	Conclusion	416
27	Case study analysis	419
	<i>Esther Seha and Ferdinand Müller-Rommel</i>	
1	Introduction	419
2	Case study analysis in political science: between specificity and generality	419
3	Methodological standards for doing case studies	422
4	What is a case?	422
5	Single and comparative case studies	423
6	Case selection	424
7	Concluding remarks	427
28	Cluster analysis	430
	<i>Uwe Wagschal</i>	
1	Introduction	430
2	Application and capacity of cluster analysis in political science	431
3	How to apply cluster analysis	435
4	Strengths and weaknesses of cluster analysis	449
29	The logic of process tracing: contributions, pitfalls and future directions	452
	<i>Sherry Zaks</i>	

xii *Handbook of research methods and applications in political science*

1	Introduction	452
2	Progress with systematizing the method	453
3	The state of the state of the art	457
4	Future directions	462
5	Conclusions and future directions	463

**PART V EVALUATION AND RELEVANCE OF RESEARCH OUTPUT**

30	Political science research and its political relevance	469
	<i>Ben Crum</i>	
1	Introduction	469
2	Max Weber and the empirical character of the social sciences	470
3	Bracketing values in social science	473
4	The social scientific imagination	478
5	Conclusion	480
31	What's methodology got to do with it? Public policy evaluations, observational analysis and RCTs	483
	<i>Edward C. Page</i>	
1	Introduction	483
2	Success and the uptake of policy research	485
3	Does methodology shape uptake?	487
4	Improving uptake: the promise of RCTs	489
5	Methodology and evaluation	493
32	Re-analysis, testability and falsification	497
	<i>Jan-Erik Lane</i>	
1	Introduction	497
2	Testability: confirmation, falsification and innovation	498
3	The frozen party system theory	500
4	Some relevant political changes from the 1970s to 2010	502
5	Conclusion	510
33	The art of publishing: how to report and submit your findings	514
	<i>Richard S. Katz</i>	
1	Introduction	514
2	Academic publications	515
3	Books	522
4	Writing for the public and policy-makers	526
5	Conclusion	526
	<i>Index</i>	529
