Index

1st Five-Year Plan (China) 120

Abraham, V. 250, 257
"absorptive capacity" 8, 56, 58–9, 61, 67, 89, 129–30, 140–41
"academic capabilities" 8, 15, 18, 56, 62–3, 67
"academic entrepreneurship" 71
Adeoti, J.O. 25, 47, 221
"affiliated suppliers" 152, 154
Albuquerque, E. 99, 162
Amsden, A. 18
ANPCyT (Agencia Nacional de Promoción Científica y Tecnológica) 100–101
"antennae" role 14, 17
apartheid 20, 24, 38
APITD (Action Plan for Industrial Technology Development) 69
applied sciences 146, 196, 210, 212–13
AREs (academic-run enterprises) 22
Argentina
  and Asian UILs comparison 87
  channels of information 159–60
  degree of success of UILs 150, 151
  firm innovation data 148–9, 150
  impact of UILs on universities 257
  interaction comparisons 9
  modes of relationship 160–61
  "moving thresholds" data 3–4
  PRO–I interactions
    benefits from 110–14, 178, 181, 186, 187, 192
    channels of 164–5, 169–70, 176
    comparative analysis 107–13
    drivers of interaction 114, 115
    historical roots of PRO–I interactions 98, 99–101
    methodology 106
    study data 169
  "regimes of interaction" data 2–4, 5
  S&E matrices of interaction
    historical roots of "points of interaction" 213, 214–15, 216
    matches and mismatches 216–18
    matrix data 199–203
    research methodology 197–8
    US comparisons 210–12
  trajectory of 2–4, 5
Arocena, R. 56, 247
Arza, V. 9, 10, 66, 96, 97, 166, 167, 221, 257
Azevedo, J.G. 227

basic sciences 212–13
Bayh–Dole Act (1980) 72, 160
Bekkers, R. 95, 191
benefits from PRO–I interactions
  firms survey 178, 180–86, 192–3
  international comparisons 191, 192–3
  Latin American study 95–7, 106, 110–14, 117–19
  motivations for firms and researchers 168
  researcher survey 186–91, 193
"bi-directional" channel of interaction
  international PRO–I comparisons 170, 172, 174, 192
  Latin American PRO–I study 97, 98, 108–9, 112–13, 117–18
  motivations for PRO–I interactions 167–8
"big science" 42, 44, 90
BIOTEC (National Center for Genetic Engineering and Biotechnology) 70, 91
biotechnology sector 50–51
Bodas Freitas, I.M. 95, 191
"boomerang effect" 15
Boschma, R.A. 59
"branch plants" 72, 131

Eduardo Albuquerque, Wilson Suzigan, Glenda Kruss and Keun Lee - 9781784711108
Downloaded from Elgar Online at 05/18/2021 09:10:04AM
via free access

Branscomb, L.M. 55–6, 75
Brazil
  and Asian UILs comparison 87
  and "Changing Universities" programme 247
  channels of information 159–60
  constraints on industrialization 20
  degree of success of UILs 150, 151
  and dynamics of interactions 21
  firm innovation data 148–50
  and foreign-owned firms 221
  and global interactions 25, 232, 233–4, 240–41, 242
  health demands 19
  impact of UILs on universities 257
  interaction comparisons 9
  modes of relationship 160–61
  "moving thresholds" data 3–4
  PRO–I interactions
    benefits from 110–14, 178, 180, 182, 186, 188, 192
    channels of 107–9, 112–14, 164–5, 170–71, 176–7, 191
    comparative analysis 107–13
    historical roots of PRO–I interactions 98, 101–2
    methodology 106–7
    study data 169
  "regimes of interaction" data 2–4, 5
  S&E matrices of interaction
    historical roots of "points of interaction" 213, 215–16
    matches and mismatches 216–18
    matrix data 206–10
    research methodology 197, 198–9
    US comparisons 210–13
  sources of information for technological innovation 152–8
  trajectory of 2–4, 5

Callaert, J. 194
capitalism 14, 20, 195, 229
Carnegie Mellon Survey (CMS) 10, 12, 18, 34, 75, 124, 127, 146, 147, 194, 197–8, 251
Casas, R. 99, 214
Catalán, P. 225
Catch Up Project 6, 17, 18
CENIBIOT (Centro Nacional de Innovaciones Biotecnológicas) 103
Chaebol firms 67–8, 74
"Changing Universities" programme 245–54, 258
"channels of information" data 158–60
channels of interaction
  and "Changing Universities" programme 252–3
  PRO–I interactions
    conceptual framework of study 166–8
    firms survey 169–76, 191–2
    international comparisons 164–5, 191–2
    and knowledge transfer 164
    Latin American study 94–7, 106, 107–10, 112–14, 117–19
    researcher survey 176–8, 179–80, 191–2
    study data 168–9
  and transition of UILs in China 127–30, 138–40, 141–2
China
  benefits from PRO–I interactions 180–81, 183, 185, 186–7, 189, 192
  and "Changing Universities" programme 253
  channels of information 159–60
  channels of PRO–I interaction 164–5, 172–3, 174, 177–8, 179, 191–2
  degree of success of UILs 150
  and dynamics of interactions 22
  effectiveness of UILs in catch–up process 90
  firm innovation data 148–9
  and foreign-owned firms 221
  and GINs 223
  global GDP share 148
  and global interactions 233–4, 240–41
  historical roots of UILs 71–2
  interaction comparisons 8, 9
  macro-institutional arrangements 73, 74–5
  modes of collaboration 75–6, 78
  modes of relationship 160–61
  "moving thresholds" data 3–4
  outcomes of UILs 82–3
  PRO–I interaction study data 169

Eduardo Albuquerque, Wilson Suzigan, Glenda Kruss and Keun Lee - 9781784711108
Downloaded from Elgar Online at 05/18/2021 09:10:04AM
via free access

"regimes of interaction" data 2–4, 5
regional/sectoral differences 85, 86
sources of information for technological innovation 152–8
trajectory of 2–4, 5
and transition of UILs
channels of interaction 127–30, 138–40, 141–2
current situation 136, 138–40
differing types of universities 135–6, 137
historical background 120–23
importance of universities as knowledge source 131–6, 142
and knowledge transfer 123–4, 126–7
S&T field 122–3, 126–7, 140, 142
survey data 124–6, 127
and UREs 121–2, 123, 126–7, 141
Chinese Academy of Sciences 120
Chunyan, Z. 31
CINVESTAV (Centro de Investigación y de Estudios Avanzados Unidad Mérida) 105
CNEA (Comisión Nacional de Energía Atómica) 100
CNPq (Conselho Nacional de Desenvolvimento Científico e Tecnológico) 198
cognitive proximity 60, 81, 85
Cohen, W.M. 1, 10–11, 21, 25, 61, 75, 128–9, 141, 152–3, 155, 160, 194–7, 199, 212–13, 252
Colyvas, J. 194
"commercial" channel of interaction
international PRO–I comparisons 170, 172, 174, 176–7, 192
Latin American PRO–I study 96, 107–9, 113, 117, 119
motivations for PRO–I interactions 167–8
Companhia Vale do Rio Doce (Brazil) 215
CONACYT (Consejo Nacional de Ciencia y Tecnología) 104, 105
CONICET (Consejo Nacional de Investigaciones Científicas y Técnicas) 100, 102
Costa Rica
and Asian UILs comparison 87
channels of information 159–60
degree of success of UILs 150, 151
firm innovation data 148–9, 150
impact of UILs on universities 257
interaction comparisons 9
modes of relationship 160–61
"moving thresholds" data 3–4
PRO–I interactions
benefits from interactions 110–14, 180, 182, 185, 186, 188, 192
channels of interaction 107–9, 112–14, 164–5, 172, 177–8
comparative analysis 107–13
drivers of interaction 114, 115
historical roots of PRO–I interactions 98, 102–4
methodology 107
study data 169
"regimes of interaction" data 2–4, 5
trajectory of 2–4, 5
Cozzens, S. 225
CSN (Companhia Siderúrgica Nacional) 215
Cultural Revolution (China) 22, 121–2
customers (as knowledge source) 131, 132, 133, 134

danwei system (China) 72
David, P. 56
degree of directness (UIL scale) 64
degree of formality (mode of interaction criteria) 166
degree of interaction (mode of interaction criteria) 166
Deng Xiaoping 22, 122
"developmental universities" 247, 255
DGP (Censo do Diretório dos Grupos de Pesquisa) 198–9
direction of knowledge flows (mode of interaction criteria) 166
Dosi, G. 22
Dubrée, Auguste 215
DUI ("doing–using–interacting") mode of knowledge acquisition 43, 44, 46
Dunning, J. 223
Dutrénit, G. 9, 61, 221
dynamics of interactions 21–3
