Contributors

**Pedro Araujo** is a PhD candidate at the University of Lausanne, Switzerland, in the Life Course and Inequality Research Centre (LINES). His main areas of interest include the sociology of elites, economic sociology and life course. He currently works on the biographical trajectories of banking elites in Switzerland.

**Belen Barroeta** is Chief Executive Officer at Informacion y Desarrollo S.L. (INFYDE). She specializes in innovation and competitiveness policies, specifically the definition, implementation and evaluation of regional strategies. She works for regional and national governments in Europe and Latin America, as well as multilateral institutions such as the European Commission in projects related to regional development.

**Jeannie Bélicard** is a research assistant. She contributed to the studies within the programme Interreg IV ‘The Ways of Tourism Innovation’ in 2011–2012.

**Roberto Camagni** is full Professor of Urban Economics and of Economic Assessment of Urban Transformations, Politecnico di Milano, Italy, President of GREMI – Groupe de Recherche Européen sur les Milieux Innovateurs and Past President of the European Regional Science Association. In 2010 he received the ERSA-European Investment Bank Prize for his scientific contribution to regional and urban economics. He is the author of a textbook on urban economics and of more than 150 international publications.

**Luís Carvalho** (PhD, Erasmus University Rotterdam, the Netherlands) is Associate Researcher at the Centre of Studies in Geography and Spatial Planning (University of Porto, Portugal) and at the European Institute for Comparative Urban Research (Euricur). He specializes in economic geography, innovation and local economic development. Current research interests focus on urban sustainability transitions and the geography of ‘smart city’ innovation.

**Jaime del Castillo** is Professor of Applied Economy at the Basque Country University, Spain. He specializes in regional development, territorial competitiveness and innovation policies. He works for the
European Union (EU) Directorate-General for Regional and Urban Policy (DG Regio), the Interamerican Development Bank and other multilateral institutions. He has long-standing experience in the field of innovation and technology development such as the design of territorial development strategies in regions affected by development problems.

**Pedro Costa** is an economist with a PhD in Urban and regional planning. He is Professor in the Department of Political Economy at Instituto Universitário de Lisboa (ISCTE-IUL) and Director of DINAMIA/CET-IUL, where he coordinates the research line on ‘Cities and territories’. He works mainly in the areas of cultural economics, territorial development and planning, focusing most of his recent research on the study of creative dynamics and their relations with territorial development.

**Olivier Crevoisier** is Professor of Territorial Economy at the University of Neuchâtel, Switzerland. He has developed a territorial understanding of innovation, of financial markets, of real estate and more generally of value construction at the crossroads between institutional economy, geography and sociology.

**Marcello De Rosa** is an agricultural economist specializing in the territorial analysis of agrofood and rural systems. He is associate professor at University of Cassino and Southern Lazio (Italy). Among his interests are localized food systems, rural development economics and family farm businesses. He is currently working on sustainable models of rural development and on territorial innovation models in rural areas.

**Miranda Ebbekink** is an economist specializing in regional development with an expertise in public policy, public administration and economic geography. She is a PhD Researcher at the Nijmegen School of Management, Institute for Management Research, Radboud University, the Netherlands. She is particularly interested in issues such as cluster governance, inter-institutional collaboration and policy design and implementation processes.

**Bernard Guesnier** is Professor Emeritus at the University of Poitiers, France. With Laboratory CRIEF at the Faculty of Economic Sciences, he works on sustainable development, environment, territorial and patrimonial economy, and territorial governance. He is involved in the promotion and valorization of local skills in small enterprises, and proximity relations.

**Leïla Kebir** is an economist specializing in regional development. She is a Lecturer at the Ecole des Ingénieurs de la ville de Paris/Lab’Urba Paris Est, France. She is particularly interested in issues such as local resource
development and innovation organization. She currently works more specifically on territorial sustainability and adaptation issues.

Arnoud Lagendijk is a Professor of Economic Geography at Nijmegen School of Management, Institute for Management Research, Radboud University, the Netherlands. His research focuses on the emergence of spatial practices, institutions and policies, through what can be characterized as a process of 'geographical becoming'. Currently he is exploring the institutional and strategic dimensions of conceptual flows and translations in various fields.

Frederik Lindner is an economic geographer currently employed at the Office for Research and Transfer at the Friedrich Schiller University Jena, Germany. He is particularly interested in knowledge transfer, innovation processes and the promotion of economic as well as regional development.

Christian Livi is a PhD candidate at the University of Neuchâtel, Switzerland, in the Research Group on Territorial Economy (GRET). He is particularly interested in issues such as innovation, market construction and value creation considering territorial and social contexts. He currently works more specifically on cleantech and medtech activities in Western Switzerland.

Yoshiyuki Okamoto is a Professor of Industrial and Territorial Economy, and is the Deputy Director of the Center for Regional Research at Hosei University in Tokyo, Japan. He has been concerned with policy-making and developed the industrial and territorial policies of the government and cities in Japan. He has built up relationships with many local governments on innovative industrial and regional projects.

Jonatan Paton has a PhD in Economics – Basque Country University, Spain. He specializes in territorial competitiveness, clusters and cluster policies. He also specializes in quantitative economy. He works for regional and national governments in Europe and Latin America on projects related to regional development, territorial competitiveness and innovation policies.

Véronique Peyrache-Gadeau specializes in territorial development, notably applied to mountain regions. She is co-director of the Edytem laboratory (Environments, Dynamics and Mountain Territories) at the University of Savoie Mont-Blanc, France. Her main research themes include socioeconomics, innovative milieus, sustainable development, tourism and nature protection and resources management.

Inês Plácido Santos is an innovation manager at Instituto Pedro Nunes, the
technology transfer association of the University of Coimbra, Portugal. She holds a Masters in Urban Economics and Management. She supports entrepreneurs developing technological products and services aiming at improving everyday life, for instance by addressing health, mobility and environmental protection challenges.

Sarah Rutter is a project manager with ASADAC-MDP, a consulting bureau based in Chambéry, France. She specializes in European cooperation projects, in particular the Alpine Space and Alcotra (France–Italy) programmes, and also works on other European funding programmes. Her fields of interest include environmental protection, stakeholder participation, local and rural development, and sustainability.

Mitsuru Sato is an economist specializing in regional industry. He is an Assistant Professor at the University of Fukuchiyama, Japan. He is particularly focused on mechanisms of regional innovation, and processes of sustainable regional development. He is currently researching the relationship between regional innovation and regional resilience.

Simone Strambach is an economic geographer and specializes in the geography of innovation and knowledge economies. She is a Professor at Philipps-University Marburg, Germany. Her major research fields are the transformation of national and regional innovation systems, institutional change and regional governance. Her current work focuses on knowledge dynamics and sustainable innovation in global change.

Ferro Trabalzi is an urban planner specializing in urban and regional international development. He teaches at John Cabot University in Rome, Italy. Among his interests are traditional food networks, urban farming and urban sociology. Currently he is working on food systems and immigration in Italy.

Mário Vale has a PhD in Human Geography from the University of Lisbon, Portugal. He is currently a Full Professor at the Institute of Geography and Spatial Planning and he is the Director of the Centre for Geographical Studies at the University of Lisbon. His research topics have focused on internationalization, innovation and regional development policies in European regions.
