Elisabeth Alofs (PhD in Law, Advanced Masters in Social Law) is Professor of Law at the Vrije Universiteit Brussel (Free University of Brussels), Belgium, where she teaches family law, matrimonial property law and inheritance law. She publishes on family law and social security law, especially about the legal status and protection of married and non-married partnerships in private and public law.

Tine Brouckaert has a PhD in Comparative Sciences of Culture at the Ghent University, Belgium and the University of Saint-Etienne, France. Her dissertation on ‘Accoucher la citoyenneté. Expériences et témoignages de femmes sans-papiers à propos de leur travail maternel’ (Giving birth to citizenship) addresses questions on mothering with an undocumented citizenship status. Her research interests are critical citizenship studies, mothering, anthropology of gender and diversity, postcolonial and feminist studies.

David De Wachter holds a PhD in Sociology and is a researcher at the University of Antwerp (Centre for Longitudinal and Life Course Studies, CLLS), Belgium, involved in research on socio-economic differentials in fertility and family formation in Europe and on the pension protection of first, second and subsequent generations of immigrants in Belgium.

Christine Defever holds a Master’s degree in Sociology. She works as junior researcher in the Flemish Policy Research Centre on Equality Policies. She published a Gender Monitor for the Flemish Government and is currently researching lone parenthood and the transition to adulthood.

Katie Featherstone is Director of Post Graduate Research at Cardiff School of Nursing and Midwifery Studies, UK. Her expertise is in the sociology of biomedical knowledge, with particular emphasis on the social consequences of genetic technologies. She has produced a body of ethnographic work examining kinship and disclosure in the context of genetic risk information; the classification of genetic syndromes and their social consequence; the technologies of health service evaluation and clinical guidelines; and the diagnosis and classification of medical entities. The recurrent theme of this work is the production and translation
Changing family dynamics and demographic evolution

of biomedical knowledge and the interaction between the laboratory, the clinic, and patient populations.

Frank F. Furstenberg is the Zellerbach Family Professor of Sociology and Research Associate in the Population Studies Center at the University of Pennsylvania, USA. His previous books and articles centre on children, youth, families and the public. His current research projects focus on the family in the context of disadvantaged urban neighbourhoods, adolescent sexual behavior, cross-national research on children’s well-being and urban education.

Tine Kil holds a Master’s degree in Sociology. She is currently working at the Centre for Longitudinal and Life Course Studies (CLLS) at the University of Antwerp, Belgium, where she is preparing a doctoral dissertation on the link between work, family and social policy. Her research focuses on socio-economic and ethnic differentials in family formation in Belgium.

Koenraad Matthijs is Full Professor of Sociology, and president of the Research Group Family and Population Studies at the Centre for Sociological Research, Faculty of Social Sciences, KU Leuven, Belgium.

Petra Meier is Professor at the Department of Political Science, University of Antwerp, Belgium and coordinator of the Flemish Policy Research Centre on Equality Policies. Her research and publications focus on the representation of gender in politics and policies. Her latest publication is The Symbolic Representation of Gender. A Discursive Approach (with Emanuela Lombardo, 2014, Ashgate).

Dimitri Mortelmans is Full Professor of Sociology at the Faculty of Social Sciences of the University of Antwerp, Belgium. He teaches qualitative research methods, applied multivariate statistics and advanced topics in family sociology, life-course sociology and demography. He is head of the Centre for Longitudinal and Life Course Studies (CLLS). His research concentrates on family sociology and sociology of labour. He has published on divorce, new constituted families, gendered labour careers and work–life balance. He is also the main author of the Step in Statistics book series of which six volumes have been published (in Dutch). On qualitative methodology, he published the Handbook of Qualitative Research Methods and Qualitative Analysis with Nvivo.

Lívia Murinkó holds a PhD in Sociology from the Corvinus University of Budapest, Hungary. She has been a Research Fellow at the Hungarian Demographic Research Institute (HDRI) since 2008. Her main research interests include family and household structure, fertility patterns, transition to adulthood, event history analysis and multilevel regression modelling. Her main publications in English are:
Contributors

Karel Neels is Associate Professor of Demography and Statistics at the Centre for Longitudinal and Life Course Studies (CLLS) at the University of Antwerp, Belgium. His work focuses on patterns of family formation and the position of migrant populations in Belgium and Europe.

Jacqueline Scott is Professor of Empirical Sociology at the University of Cambridge, UK and a Fellow of Queens’ College. From 2004 to 2009 she was director of a large UK research network on gender inequalities in production and reproduction, GeNet, funded by the Economic and Social Research Council. GeNet produced three edited books: Women and Employment, Changing Lives and New Challenges (Scott et al., 2008); Gender Inequalities in the 21st Century (Scott et al., 2010) and Gendered Lives, Gender Inequalities in Production and Reproduction (Scott et al., 2012). Her current interests include family change and life course research.

Barbara Segaert holds a Master’s degree in Oriental Studies, Islamic Studies and Arab Philology from KU Leuven, Belgium and a Master’s in the Social Sciences from the Open University, UK. Since 2002 she has been scientific coordinator at the University Centre Saint-Ignatius Antwerp, Belgium, where she develops academic programmes on various topics of contemporary relevance to society.

Wendy Sigle is Professor of Gender and Family Studies at the Gender Institute and the Centre for Analysis of Social Exclusion of the London School of Economics, UK. Her research applies both econometric and demographic methods to analyse questions on family issues. Her work spans a wide interdisciplinary base including sociology, economics, gender studies and demography. Thus far, the primary focus has been to gain a better understanding of the processes of family formation and the ways in which family structure is related to subsequent outcomes for children and adults in the United States and other industrialized countries.

Ivett Szalma holds a PhD in Sociology from the Corvinus University of Budapest, Hungary. She currently works as a Postdoc Researcher at the Swiss Centre of Expertise in the Social Sciences (FORS). She is the Head of the Family Sociology Section of the Hungarian Sociological Association. Her research topics include the effects of economic crises on work–life conflict,
post-separation fertility, childlessness, and the measurement of homophobia and adoption by same-sex couples. Her main publications in English are:

Laurent Toulemon leads the Research Unit on Fertility, Family and Sexuality at the French National Institute for Demographic Studies (INED), Paris, France. His main research fields are fertility measures and determinants, including partnership behaviour and the use of contraception, migration and integration, family and children, society and solidarity, projections and forecasts. He is currently working on non-standard family forms, including multiple residence and, more precisely, the family situations related to having more than one usual residence. Together with Olivia Samuel and Anne Solaz, he is editor of the journal Population.

Jorik Vergauwen is currently working for the Centre for Longitudinal and Life Course Studies (CLLS) at the University of Antwerp, Belgium, where he is preparing his Doctoral dissertation. This dissertation is part of a research project on ‘Socio-economic differentials in fertility and family formation in Europe: how are they related to social policies and economic context?’ In the context of this project he is preparing several research papers on how transitions between living arrangements (in relation to family formation) are linked to economic context and interrelated with education. He has been presenting this work at various international conferences and some of the papers are pending publication in international peer-reviewed scientific journals.

Jonas Wood is Junior Researcher at the Centre for Longitudinal and Life Course Studies (CLLS) at the University of Antwerp, Belgium. His work focuses on socio-economic differentials in family formation, uptake of family policy, and maternal employment.
