

# Tables

---

|      |  |     |
|------|--|-----|
| 5.1  | Variable definitions   | 79  |
| 5.2  | Descriptive statistics and pairwise correlations for the full sample (H1)  | 81  |
| 5.3  | Logistic estimate of the likelihood of early internationalization as a function of resource flexibility  | 82  |
| 5.4  | Descriptive statistics and pairwise correlations for the international sample (H2a, H2b, H2c)  | 83  |
| 5.5  | Logistic estimate of the international sales intensity, short-term survival, and short-term sales growth as a function of resource flexibility | 85  |
| 6.1  | Geographical, organizational and technological proximity   | 98  |
| 6.2  | Small firm characteristics   | 101 |
| 6.3  | Quotes illustrating asymmetry dynamics   | 103 |
| 6.4  | Quotes illustrating the level of proximity   | 106 |
| 7.1  | Finland and Russia as institutional contexts for science-based entrepreneurship  | 124 |
| 7A.1 | Profiles of science-based entrepreneurs in Finland and in Tomsk Province, Russia   | 138 |
| 7A.2 | Examples of interview codes  | 140 |
| 8.1  | Level of intention during studies and entrepreneurial behaviour after graduation   | 155 |
| 8.2  | Logistic regression, variables in equation   | 155 |
| 8A.1 | Variables and their items  | 164 |
| 8A.2 | Correlations among studied variables   | 166 |
