

Contributors

Dr Ananya T. Banerjee is a second-generation migrant settler from India. She is Assistant Professor at the Dalla Lana School of Public Health, University of Toronto. Dr Banerjee studies the social determinants and lived experiences of diabetes among South Asian migrant communities in Canada. Her public health research exemplifies her commitment to providing a strong foundation in quantitative and qualitative methods guided by principles of the socio-ecological framework, intersectionality, community-based participatory research and cultural safety.

Dr Vera Chouinard is a critical social and feminist geographer. Her interests include gender and intersectionality, disability issues and disability in the Global South, disability human rights law, experiences of 'madness', accommodation issues and issues of marginalization in society and space. She is currently a Professor in the School of Geography and Earth Sciences at McMaster University. Her personal experiences of oppression on bases of gender and disability have helped to inspire her academic work.

Xiaojun Deng is a PhD student at Queen's University. She came from Xi'an, Shaanxi Province in the People's Republic of China. Her current research is on the health and well-being of older Chinese immigrants in the Greater Toronto Area, how their health compares to the older Canadian-born population and older people living in the People's Republic of China.

Dr Sigalit Gal is a recent PhD graduate from the McGill School of Social Work. Her research focuses on the effects of the childhood experience of political violence (during the Argentinian dictatorship of the 1970s) on the adult lives of Jewish Argentinians who immigrated to Israel.

Dr Sylvie Gravel holds a doctorate in public health from the University of Montreal. Since 2006 she has been a professor at the Organization and Human Resources department, at the School of Management of the University of Quebec at Montreal. She directs the Institute for Health and Society at UQAM, after five years as the director of the interdisciplinary doctoral program attached to the same institute. Her research focuses on the health and safety of workers holding more types of precariousness (personal rental agencies, temporary foreign workers, workers in small non-union) and health inequalities arising from work.

Dr Jill Hanley (PhD) is Associate Professor at the McGill School of Social Work, where she teaches social policy, community organizing and migration, and Scientific Director of the SHERPA University Institute on access to health and

social services for immigrants and ethnic minorities. Her research focuses on access to social rights (health, housing, labour) for precarious status migrants, as well as their individual, family and collective strategies to defend these rights. She is also the co-founder of the Immigrant Workers Centre, where she has been active for nearly 20 years.

Dr Jenna Hennebry is an Associate Professor at the Balsillie School of International Affairs, and the Department of Communication Studies at Wilfrid Laurier University in Canada. She is the co-founder of the International Migration Research Centre, where she has carried out global comparative research on migrant workers. Her recent research, published by UN Women, focuses on the role of global, national and bilateral governance in protecting the human and labour rights of women migrant workers.

Dr Lori M. Hunter is Professor of Sociology and Director of the CU Population Center in the Institute of Behavioral Science, University of Colorado Boulder. She studies links between environmental change and population dynamics, particularly migration as a livelihood strategy. Dr Hunter is a member of the National Academies of Science Board on Environmental Change and Society and is past-editor of *Population & Environment*. Her research has been supported by NIH and NSF, among others.

Dr Audrey Kobayashi (PhD FRSC) is a Professor and Queen's Research Chair in Geography at Queen's University in Kingston, Ontario. She has published extensively in the fields of immigration, anti-racism, and human rights. Her current research is on access to affordable housing in Vancouver and Dublin.

Jah-Hon Koo is a PhD candidate in social work at McGill University. His research focuses on labour process and power relations in the workplaces of migrant domestic workers (live-in caregivers) in Canada. In South Korea, where he is originally from, he worked as a community organizer at a migrant workers' centre and has taught courses on social welfare, community practice, and social policy as a part-time lecturer.

Dr Loic Malhaire (PhD) is an Instructor in the Department of Social Services at the Universidad del Valle de Guatemala (UVG) and at the Universidad Rafael Landivar (URL) in Guatemala. He is also a member of Montreal's Immigrant Workers Centre.

Dr K. Bruce Newbold is a Professor of Geography at McMaster University in Hamilton, Ontario. Trained as a population geographer, he has held guest scholar positions at the University of California San Diego's Center for Comparative Immigration Studies (CCIS) and at the University of Glasgow's Social and Public Health Sciences Unit, where he held a Journal of Urban Studies Fellowship. His research interests include migration, immigration, health, and aging.

Jo-Ann Osei-Twum is a second-generation migrant settler from Ghana. She is a recent graduate of the Master of Public Health program at the University of Toronto, where her research focused on the social determinants of health in Black

communities in Ontario. Within her research practice, Jo-Ann seeks to integrate the concepts of cultural safety, decolonizing methodologies, and social justice principles. Jo-Ann is committed to furthering solidarity efforts between Indigenous, Black and immigrant communities in Canada.

Sol Park is a Master's student in the Division of Social and Transcultural Psychiatry at McGill University. For her Master's project, Sol is studying the influences that migration has on immigrant Korean families' parenting and child supervision norms and practices, with a special focus on the perceived consequences of different parenting and supervision practices on a child's physical and mental health. Her project takes into account the perspectives of caregivers as well as young people's voices.

Erika Pulfer has mixed European settler and nehiyaw (Plains Cree) ancestry, and kinship ties and treaty rights with Saddle Lake Cree Nation in Treaty 6. She is a recent graduate of the Master of Public Health program at University of Toronto, where she focused on social and political determinants of health in Indigenous communities. Erika is committed to building solidarities and understanding responsibilities between Indigenous and non-Indigenous communities in order to build strategic alliances towards decolonization.

Daniel H. Simon is a doctoral student in the Department of Sociology at the University of Colorado Boulder and is affiliated with the CU Population Center in the Institute of Behavioral Science. As a National Science Foundation Graduate Research Fellow, his research is broadly focused in two substantive areas: 1) the relationship between environmental change and demographic behaviour, primarily in the Mexico-US context, and 2) recent trends in US population health and mortality.

Katherine B. Stelfox has a Bachelor of Science in Nursing from the University of Alberta, and a Master of Science in Global Health from McMaster University, with a special interest in food security issues and maternal and newborn health. Prior to attending graduate school Katherine worked as a registered nurse in neonatal intensive care in Edmonton, Alberta, and now spends part of the year doing contract work for Qikiqtani General Hospital on Baffin Island, Nunavut. When not working in the Canadian Arctic, Katherine enjoys long-distance hiking, recently completing the Appalachian and Pacific Crest trails, totaling over 7,700 kilometres walked.

Dr Margaret Walton-Roberts is a Professor in the Geography and Environmental Studies department at Wilfrid Laurier University, and affiliated to the Balsillie School of International Affairs, Waterloo, Ontario. Her recent research explores gender and skilled migration in the case of Indian trained nurses working overseas. Her current research focuses on the international migration of health care professionals within Asia and from Asia to North America and Europe.

Dr Lu Wang is a Professor in the Department of Geography and Environmental Studies at Ryerson University, Toronto. Her research focuses on neighbourhood and health, geographic and ethnic variations in health outcome, access to care

among vulnerable populations and ethnic retailing. Her recent work focuses on the healthcare experiences among transnational migrants and the language and location discordance in accessing care among older immigrants in Canada. Dr. Wang extensively uses a mixed-methods approach in research which combines statistical, geospatial and qualitative methods.

Dr Kathi Wilson is a Professor in the Department of Geography at the University of Toronto Mississauga. As a social/health geographer, Dr Wilson's research addresses questions related to the role of place in shaping health and access to health care and social services. She has extensive experience conducting community-based research with Indigenous and immigrant populations and organizations serving these populations. Her most recent work focuses on the impacts of un/under employment among newcomer populations and the potential of rural relocation in supporting the employment of highly skilled immigrants.
