

Figures and tables

FIGURES

4.1	Micro firm learning community model	55
6.1	Empirical model for internationalized firms	92
6.2	Empirical model for firms operating only in domestic markets	93
7.1	Examples of courses or programmes inserted in the typology	116
8.1	Teaching model framework for entrepreneurship education (Fayolle and Gailly, 2008)	129
10.1	Example of coding and transforming data from first-order codes to second-order themes to theoretical dimensions	173

TABLES

3.1	Operationalization of proximity	31
3.2	Innovation phases, proximity and effect on speed of innovation	36
4.1	Participant and observation details	47
5.1	Definitions of variables	69
5.2	Descriptive statistics (N = 104)	70
5.3	Composition of internal and external social capital	71
5.4	Matrix of simple correlations	72
5.5	Variance inflation factors (VIF) tests	73
5.6	Estimates of the relationship between growth and social capital	74
6.1	Estimates and standardized regression weights of the model (internationalized firms)	93
6.2	Estimates and standardized regression weights of the model (firms operating in domestic markets)	93
7.1	Comparison of articles on entrepreneurship education from literature review	110
8.1	The research material	130

9.1	Empirical material	150
10.1	Overview of case entrepreneurs	171
10.2	Types of identity narratives used to explain career choice	175
10.3	Initial choice of narrative and motivation	180
