Contributors

Dominique Anxo is Professor of Economics at the Department of Economics and Statistics, Linnaeus University and Director of the Centre for Labour Market Policy Research (CAFO). His research interests fall broadly into the areas of labour economics, industrial relations, gender economics, time allocation and evaluation of employment and labour market policy. Recent publications include Anxo, D., C. Erhel and J. Schippers (eds) (2008), Labour Market Transitions and Time Adjustment over the Life Course, Amsterdam: Dutch University Press; and Anxo, D. and J.-Y. Boulin (eds) (2006), Working Time Option over the Life Course: New Work Patterns and Company Strategies, Dublin: European Foundation for the Improvement of Working Life and Working Conditions.

Gerhard Bosch is an economist and sociologist and is a Professor at the University Duisburg-Essen and Director of the Institut Arbeit und Qualifikation (institute for work, skills and training). He has published widely in the areas of comparative employment systems, low wages, industrial relations, and vocational education and training. Recent publications include Bosch, G., S. Lehndorff and J. Rubery (eds) (2009), European Employment Models in Flux, Hampshire: Palgrave Macmillan; Bosch, G. and C. Weinkopf (eds) (2008), Low-wage Work in Germany, New York: Russell Sage Foundation and Bosch, G. and S. Lehndorff (eds) (2005), Working in the Service Sector: a Tale from Different Worlds, London: Routledge.

Christine Erhel is an Associate Professor at the University of Paris 1 Panthéon Sorbonne, Centre d’Economie de la Sorbonne. She is also an Associate Researcher at Centre d’Etudes de l’Emploi. She has been working on labour market policy comparisons, life course and job quality indicators. She was involved in the Transitional Labour Markets network and in several research contracts for DG Employment of the European Commission.

Andreas Jansen is a sociologist and works as a Research Assistant at the University Duisburg-Essen. His research centres on the transition from employment to retirement, the reconstruction of the old-age, disabled and survivors’ social security system in Europe and most recently on age stereotypes and age cultures from a comparative perspective.
Balázs Kapitány is a demographer and sociologist and is a Researcher at the Demographic Research Institute (Budapest). His research focuses on the relationship between social structure and demographic behaviour. His recent publications deal with the effects of the labour market system on the realisation of fertility intentions.

Léa Lima is Assistant Professor at the Conservatoire National des Arts et Métiers (Paris) and a permanent member of the research centre LISE. Her main research topics deal with employment and social policies, youth integration strategies and the sociology of social work.

László Neumann is a sociologist and Senior Research Fellow at the Research Institute for Social Policy and Labour and at the Institute for
Political Science, Hungarian Academy of Sciences. His research interests embrace several fields of labour market policy and industrial relations: decentralised collective bargaining, employment practices and labour relations at foreign-owned companies, and the labour market impacts of Hungary’s accession to the European Union.

Chantal Nicole-Drancourt is a sociologist and a Researcher at the CNRS, in the Interdisciplinary Laboratory for Research in Socio-economics (LISE), Conservatoire National des Arts et Métiers (CNAM), Paris. Areas of interest include the analysis of employment trajectories in the face of current major changes in work organisation, family configurations and social protection systems, as well as the modification in time allocation across the life course in a gender perspective.

Albert Recio is Professor at the Department of Applied Economics at the Autonomous University of Barcelona and a member of the Centre QUIT. His research interests fall broadly into the areas of labour economics, employment structure, unions and social movements and labour policies. He has also published numerous articles and book chapters on labour economics issues. He is also editor of Revista de Economía Critica.

Jill Rubery is Professor of Comparative Employment Systems at Manchester Business School and founder and Co-Director of EWERC (European Work and Employment Research Centre). She has published widely in the areas of comparative employment systems, gender equality and labour market segmentation. She is joint author of The Organization of Employment: An International Perspective (with Damian Grimshaw, published by Palgrave Macmillan) and European Employment Models in Flux (with Gerhard Bosch and Steffen Lehndorff, published by Palgrave Macmillan). In 2006 she was elected a Fellow of the British Academy.

Annamaria Simonazzi is Professor of Economics at La Sapienza University of Rome, President of the Scientific Committee of the Fondazione Brodolini and co-editor of Economia & Lavoro. A macroeconomist, with a strong focus on institutional and social aspects, she has published widely in the areas of macroeconomic theory and policy, the economics of the welfare state, employment and gender.

Zsolt Spéder is a demographer and sociologist and is Director of the Demographic Research Institute Hungarian Statistical Office in Budapest. He has published widely on social inequalities, poverty dynamics and family formation. His more recent studies were published in Demographic Research, European Journal of Population and Population Studies.
**Paola Villa** is an economist and Professor at the University of Trento. She is the author of numerous studies on labour economics with particular reference to internal labour markets, the wage structure, the role of small firms, labour market regulations and deregulations, gender in the labour market, fertility, and labour force participation and unemployment. She is an expert on gender studies and equal opportunities policies from a comparative perspective.
