Contributors

**Kym Anderson** is George Gollin Professor of Economics and Executive Director of the Wine Economics Research Centre at the University of Adelaide, Australia. He has published a global wine statistical compendium and edited a 2004 book, *The World’s Wine Markets: Globalization at Work*. He has served on the board of directors of Australia’s Grape and Wine Research and Development Corporation (2000–05), and is a co-founder of the American Association of Wine Economists and co-editor of the *Journal of Wine Economics*.

**Lorenzo Cassi** is Associate Professor of Economics (Maître de Conférences) at University Paris 1 Panthéon-Sorbonne (France), Research Fellow at the Centre Économie de la Sorbonne (Paris 1) and Affiliated Fellow at the Observatoire des Sciences et des Techniques of Paris and at KITeS Bocconi University, Milan, Italy. His research interests include economics of innovation and technical change, technology policy and cooperative R&D, knowledge transfer and social network analysis.

**Rafael A. Corredoira** is Assistant Professor at the Robert H. Smith School of Business, University of Maryland, College Park, USA. He received his PhD from the Wharton School at the University of Pennsylvania, USA. His current research focuses on the role of social networks in inter-organizational knowledge flows, economic development, and entrepreneurship.

**Lucia Cusmano** is Assistant Professor of Political Economy at Insubria University, Varese, Italy, and Research Fellow at KITeS (Knowledge, Innovation and Technology Studies), Bocconi University, Milan, Italy. In 2010 she joined the OECD Centre for Entrepreneurship, Small and Medium-sized Enterprises and Local Development as a senior economist. She holds a PhD in economics from Pavia University, Italy, and a master of science in economics from Warwick University, UK. She has published extensively in international journals on innovation and economic development in advanced and developing regions.

**Elisa Giuliani** is Assistant Professor at the University of Pisa in Italy and Visiting Fellow at SPRU, University of Sussex in the UK. Her research interest has been directed essentially to understanding how the private
sector contributes to economic development – mainly via innovation. She has a PhD from SPRU and she has been ESRC and Jean Monnet Post-Doctoral Fellow at SPRU and at the Robert Schuman Center for Advanced Studies at the European University Institute. Her works have been published by numerous international journals and she has done consultancy work for the United Nations Economic Commission for Latin America and the Caribbean (ECLAC) and the Inter-American Development Bank.

**Martin Kunc** has worked in Chile for three years where he was involved with research related to the linkage between universities and industry in clusters. His work has been published in *European Planning Studies* and the *International Journal of Learning and Intellectual Capital*. He is currently working at Warwick Business School, UK. His research interests are in the area of regional innovation systems and the use of modeling and simulation to explore the dynamics of regional innovation systems.

The late **Jo Lorentzen** ran a research unit on innovation and development at the Human Sciences Research Council in Cape Town (South Africa). He worked with city and regional governments in South Africa on innovation and industrial policy and with national entities on assessments of the national innovation system. He was part of the Globelics network and co-directed a large global consortium on the emerging geography of knowledge-intensive activities in the global economy (www.ingineus.eu). He was also involved in research on innovation in the agricultural and health systems of low-income countries.

**Gerald A. McDermott** is Associate Professor of International Business in the Darla Moore School of Business at the University of South Carolina, Columbia, USA. He received his PhD in political science at the Massachusetts Institute of Technology. His work focuses on the interaction between institutional change and inter-firm networks by analyzing industrial restructuring and innovation in emerging market countries, especially in East Central Europe and Latin America.

**Andrea Morrison** is Assistant Professor at the Department of Economic Geography, Utrecht University, the Netherlands, and research affiliate at KITeS-Bocconi University, Milan, Italy. His research interests lie in the area of evolutionary economic geography, with particular attention to the evolution of industrial clusters. Most recently his research has focused on the geography of innovation and science. His work has been published in leading international journals, such as *Regional Studies, European Planning Studies, the Journal of Evolutionary Economics, Research Policy* and *World Development*.
