Introduction xvi
Andrew M. Jones

POPULATION HEALTH AND HEALTH CARE SYSTEMS

Part I Population health

1 Understanding the relationship between macroeconomic conditions and health
   Christopher J. Ruhm 5

2 The dynamics of health
   Andrew M. Jones, Nigel Rice and Paul Contoyannis 15

3 Health and work of older workers
   Maarten Lindeboom 24

4 Using observational data to identify the causal effects of health-related behaviour
   M. Christopher Auld 36

5 Economics of public health interventions for children in developing countries
   David Bishai, Divya Nair and Taghreed Adam 46

6 Health behaviours among young people
   Don Kenkel 60

7 Economics of obesity
   Peter J. Huckfeldt, Darius N. Lakdawalla and Tomas J. Philipson 70

8 Illicit drugs and drug-related crime
   Jody L. Sindelar and Todd Olmstead 81

Part II Health care finance and demand

9 The value of health insurance
   John A. Nyman 93

10 Incentive and selection effects in health insurance
    Pierre-Yves Geoffard 103

11 Prescription drug insurance and reimbursement
    Paul Grootendorst 114

12 The economics of social health insurance
    Peter Zweifel and Friedrich Breyer 123

Contents

30 Informal care
   David C. Grabowski, Edward C. Norton and Courtney H. Van Houtven 318

31 Direct to consumer advertising for pharmaceuticals: research amid the controversy
   W. David Bradford and Andrew N. Kleit 329

Part VI Assessing the performance of health care organizations

32 Concepts and challenges in measuring the performance of health care organizations
   Peter C. Smith and Andrew Street 341

33 The use of performance measures in health care systems
   Carol Propper and Deborah Wilson 350

34 Productivity analysis in health care
   James F. Burgess Jr 359

EVALUATION OF HEALTH CARE

Part VII Measuring benefits

35 Conceptual foundations for health utility measurement
   Han Bleichrodt and Jose Luis Pinto 371

36 The multi-attribute utility approach to assessing health-related quality of life
   David Feeny 383

37 Methods for developing preference-based measures of health
   John Brazier, Jennifer Roberts and Donna Rowen 395

38 Distributional judgements in the context of economic evaluation
   Aki Tsu-chiya 406

39 The capability approach: an alternative evaluation paradigm for health economics?
   Richard Smith, Paula Lorgelly, Hareth Al-Janabi, Sridhar Venkatapuram and Joanna Coast 415

40 Contingent valuation in health care
   Cam Donaldson, Helen Mason and Phil Shackley 425

41 Using discrete choice experiments in health economics
   Mandy Ryan, Karen Gerard and Gillian Currie 437

42 Design of choice experiments in health economics
   Leonie Burgess, Deborah J. Street, Rosalie Viney and Jordan Louviere 447

Part VIII Measuring costs and statistical issues

43 Estimating costs for economic evaluation
   Maria Raikou and Alistair McGuire 463

44 Dealing with skewed data on costs and expenditures
   Willard Manning 473
The Elgar companion to health economics, second edition

45 Future costs in medical cost-effectiveness analysis 481
   David Meltzer

46 Selection bias in observational data 490
   Daniel Polsky and Anirban Basu

Part IX  Economic Evaluation and Decision Making

47 Decision rules for incremental cost-effectiveness analysis 505
   Milton C. Weinstein

48 Generalized cost-effectiveness analysis: principles and practice 515
   David B. Evans, Dan Chisholm and Tessa Tan-Torres Edejer

49 Decision rules in economic evaluation revisited 528
   Stephen Birch and Amiram Gafni

50 Statistical methods for cost-effectiveness analysis alongside clinical trials 539
   Andrew Briggs

51 Decision-making with uncertainty: the value of information 550
   Karl Claxton, Elisabeth Fenwick and Mark J. Sculpher

52 Moving beyond mean-based evaluation of health care 563
   David J. Vanness and John Mullahy

53 Priority setting methods in health services 576
   Stuart J. Peacock and Craig Mitton

54 Economic evaluation and decision-makers 586
   Michael Drummond
